Comm to repay the loan in 18 annual instalments. It is obvious that no provision is made for payment of interest on the loan. The Amount will therefore have to be given free of interest. I am not sure if it is proper to permit this.

The work of reclamation of the tank is necessary in the interests both of the Matha and the myots. The latter who have agreed to pay their share would suffer if the project is delayed for lack of financial aid to the Matha. The amount may be advanced from the funds set in the specific vote on condition the Matha makes provision for payment of 6½% interest.

62 The point is clear that in the case of restoration of tanks in Inam villages - the ryots pay 1/4 of the cost and the balance is shared between the Govt: & Inamdars in the proportion of Jodi & Jari. In the present case, the ryots in the Inam village have agreed to pay their 1/4 share of cost. The intention of Govt: being that these ryots shd be treated more or less on a par with ryots in Sircar villages, the question of levy of int: on the amount recoverable from them does not seem to arise.

63 As regards the Inamdar's share of the cost, it is seen that Haniyur is a Sarva Inam village and as such the entire amount of contribution for the restoration of the tank should be paid by the Inamdar i.e. the Mutt. The amount for the Mutt is repayable is thus Rs 3975 The amount may be advanced and made repayable in 15 annual instalments with int: calculated at 6½% and the Mutt urged to make the necessary provision fully for these charges.

Sir,

I have the honor to submit herewith correspondence ending with letter No.C.3- 38-26 dated ~~6th April~~ 1st June 1927 with its enclosures received from the Deputy Commissioner, Bangalore District, submitting an estimate for Rs.4000/- for the restoration of the tank of Sarva Inam Haniyur village, Bangalore Taluk, belonging to the Sri Sivaganga Matt and to state that the Executive Engineer's letter of the 25th May 1927 and the report accompanying the estimate fully explain the need for the work. The present finances of the Matt do not permit of this expenditure. The scale of income and --- expenditure of this institution is under revision and the same will be modified so as to allow some savings to wipe off the small debit balance now outstanding against the Matt and have a sufficient --- reserve.

2. The restoration of the tank is very necessary since the ryots have come forward with their contribution of ¼th the cost of the estimate.
